Product Environmental Profile

Wiremold® EFB45BT Evolution™ Floor Box Flush Style Cover Plate with Solid Lid

■ LEGRAND'S ENVIRONMENTAL COMMITMENTS

- Incorporate environmental management into our industrial sites
- Of all Legrand sites worldwide, over 85% are ISO 14001-certified (sites belonging to the Group for more than five years).
- Offer our customers environmentally friendly solutions

Develop innovative solutions to help our customers design more energy efficient, better managed and more environmentally friendly installations

• Involve the environment in product design and provide informations in compliance with ISO 14025

Reduce the environmental impact of products over their whole life cycle.

Provide our customers with all relevant information (composition, consumption, end of life, etc.).

■ REFERENCE PRODUCT ■

The company reserves the right to change specifications and designs without notice. All illustrations, descriptions, dimensions and weights in the document are for guidance and cannot be held binding on the company.

■ PRODUCTS CONCERNED

The environmenal data is representative of the following products (see extrapolation rule at the end of the document):

EFB45BT, EFB45BTC, EFB45CT, EFB45CTC, EFB610BT, EFB610BTC, EFB610CT, EFB610CTC

Product Environmental Profile

Wiremold® EFB45BT Evolution™ Floor Box Flush Style Cover Plate with Solid Lid

■ CONSTITUENT MATERIALS

This Reference Product contains no substances prohibited by the regulations applicable at the time of its introduction to the market. It respects the restrictions on use of hazardous substances as defined in the RoHS directive 2011/65/CE.

For EFB45BT, EFB45BTC, EFB45CT and EFB45CTC, use the table below regarding the constituent materials.

Total weight of	
Reference Product	133.00oz (3770.45g) (with unit packaging)

Plastics as % of weight		Metals as % of weight		Other as % of weight		
Other plastics	4.2 %	Aluminium	56.6 %			
PC	2.5 %	Zamac	3.5 %			
PA	0.2 %	Steel	0.8 %	Packaging as % of weight		
		Other metals	0.2 %	Paper	20.0 %	
				Wood	10.0 %	
				PE	2.0 %	
Total plastics	6.9 %	Total metals	61.1 %	Total other and packaging	32.0 %	

Estimated recycled material content: 22 % by mass.

For EFB610BT, EFB610BTC, EFB610CT and EFB610CTC, use the table below regarding the constituent materials.

Plastics as % of weight		Metals as % of weight		Other as % of weight		
Other plastics	5.9 %	Aluminium	61.2 %			
PA	0.2 %	Steel	0.9 %			
				Packaging as % of weight		
				Paper	23.6 %	
				Wood	7.1 %	
				PE	1.1 %	
Total plastics	6.1 %	Total metals	62.1 %	Total other and packaging	31.8 %	

MANUFACTURE

This Reference Product comes from sites that have received ISO14001 certification.

DISTRIBUTION

Products are distributed from logistics centers located to optimize transport efficiency using EPA SmartWay® certified carriers to reduce greenhouse gases emissions. The Reference Product is therefore transported by truck from our warehouse to the local point of distribution into the market in North America, over a maximum range distance of 2175 miles [3500km].

Product Environmental Profile

Wiremold® EFB45BT Evolution™ Floor Box Flush Style Cover Plate with Solid Lid

INSTALLATION I

For the installation of the product, only standard tools are needed.

USE

Servicing and maintenance:

Under normal conditions of use, this product requires no servicing or maintenance.

Consumables:

No consumables are necessary to use the Reference Product.

■ END OF LIFE ■

Development teams integrate product end-of-life factors in the design phase.

Hazardous waste* contained in the product: no hazardous waste

(*) Hazardous waste as defined by European Commission decision 2000/532/EC.

• Recycling rate:

Calculated using the method described in the IEC/TR 62635 technical report, the recyclability rate of the reference product is estimated as 95 %. This value is based on data collected from a technological channel using industrial procedures. It does not pre-validate the effective use of this channel for end-of-life electrical and electronic products.

Separated into:

- metal materials (excluding packaging)
- plastic materials (excluding packaging)
- packaging (all types of materials)
: 29.5 %

■ ENVIRONMENTAL IMPACTS

The evaluation of environmental impacts examines the stages of the Reference Product life cycle: manufacturing, distribution, installation, use and end-of-life. IIt is representative from products marketed and used in North America.

Manufacture	Packaging taken into account. As required by the «PEP ecopassport» programme all transports for the manufacturing of the Reference Product, including materials and components, has been taken in account. The waste generated during manufacturing phase has been taken into account.
Distribution	Transport between the last Group distribution centre and an average delivery to the sales area. 2175 miles [3500km] as defined by the PCR version: PEP-PCR-ed 3-EN-2015 04 02.
Installation	The end-of-life of the packaging is taken into account at this phase
Use	 Under normal conditions of use, this type of product requires no servicing or maintenance. No consumables are necessary to use this type of product. Product category: no category pre-defined for this or this kind of product. LCA based on current PSR-003. Use scenario: no energy consumption during the 20 year working life. This modelling duration does not constitute a minimum durability requirement. Energy model: Electricity Mix; United States - 2009.
End of life	The default end of life scenario maximizing the environmental impacts
Software and database used	EIME V5 and its database «CODDE-2015-04» and the indicators defined ine the PCR ed3 in alignment with the EN 15804 standard.
